Subject Index to Volume 61

ABIOTIC STRESS
productivity improvements in rice, S114–S116 (Jun)
ACTIVITY-STRESS PARADIGM
pathophysiologic characteristics of the activity-stress paradigm in animal models, S75–S79 (May)
ADIPOCYTES
function of the nuclear receptor peroxisome proliferator-activated receptor delta, 387–390 (Nov)
ADIPONECTIN
adiponectin as a regulator of energy homeostasis, 290–292 (Aug)
ADIPOSE TISSUE
adiponectin as a regulator of energy homeostasis, 290–292 (Aug)
function of the nuclear receptor peroxisome proliferator-activated receptor delta, 387–390 (Nov)
regulation of adiposity using angiogenesis inhibitors, 384–387 (Nov)
ADULT OBESITY
overweight in childhood and the impact on adult health, 139–142 (Apr)
AGE-RELATED MACULAR DEGENERATION
lipofusion and macular degeneration, 342–346 (Oct)
AGING
sarcopenia and aging, 157–167 (May)
study of vitamins E and C for the protection of Alzheimer's disease, 69–73 (Feb)
AGRICULTURAL BIOTECHNOLOGY
safety assessment of foods produced through agricultural biotechnology, S135–S140 (Jun)
ALL-*TRANS*-RETINAL
lipofusion and macular degeneration, 342–346 (Oct)
ALUMINUM
role of aluminum in parental nutrition-associated cholestasis, 306–310 (Sep)
ALZHEIMER'S DISEASE
iron and Parkinson's disease, 311–313 (Sep)
ketones: metabolism's ugly duckling, 327–341 (Oct)
study of vitamins E and C for the protection of Alzheimer's disease, 69–73 (Feb)
ANGIOGENESIS
regulation of adiposity using angiogenesis inhibitors, 384–387 (Nov)
ANGIOGENESIS INHIBITOR
regulation of adiposity using angiogenesis inhibitors, 384–387 (Nov)
ANOREXIA NERVOSA
pathophysiologic characteristics of the activity-stress paradigm in animal models, S75–S79 (May)
role of neuropeptide Y in feeding behavior and zinc deficiency, 247–249 (Jul)
ANTIBIOTIC-RESISTANT PATHOGENS
role of probiotics on health or disease prevention, 91–99 (Mar)
ANTIOXIDANT
role diet plays on risk of cancer, 250–254 (Jul)
study of vitamins E and C for the protection of Alzheimer's disease, 69–73 (Feb)
APOA-I
lipoprotein metabolism in obesity and diabetes, 363–375 (Nov)
APOB-48
lipoprotein metabolism in obesity and diabetes, 363–375 (Nov)
APOB-100
lipoprotein metabolism in obesity and diabetes, 363–375 (Nov)
APPETITE
glycemic carbohydrate and health, S1–S4 (May)
ARE
role diet plays on risk of cancer, 250–254 (Jul)
ARTIFICIAL SWEETNERS
artificial sweetners for body weight control, 219–221 (Jun)
ASIANS
body composition and dietary intake of Asians in Singapore, S80–S87 (May)
BMI and mortality in Asian populations, 104–107 (Mar)
ASPARTAME
artificial sweetners for body weight control, 219–221 (Jun)
ATHEROSCLEROSIS
dietary fatty acids in regulating the activation of vascular endothelial cells during atherogenesis, 272–279 (Aug)
role of adhesion molecules on cardiovascular disease, 63–68 (Feb)

Subject Index to Volume 61

ABIOTIC STRESS
productivity improvements in rice, S114–S116 (Jun)
ACTIVITY-STRESS PARADIGM
pathophysiologic characteristics of the activity-stress paradigm in animal models, S75–S79 (May)
ADIPOCYTES
function of the nuclear receptor peroxisome proliferator-activated receptor delta, 387–390 (Nov)
ADIPONECTIN
adiponectin as a regulator of energy homeostasis, 290–292 (Aug)
ADIPOSE TISSUE
adiponectin as a regulator of energy homeostasis, 290–292 (Aug)
function of the nuclear receptor peroxisome proliferator-activated receptor delta, 387–390 (Nov)
regulation of adiposity using angiogenesis inhibitors, 384–387 (Nov)
ADULT OBESITY
overweight in childhood and the impact on adult health, 139–142 (Apr)
AGE-RELATED MACULAR DEGENERATION
lipofusion and macular degeneration, 342–346 (Oct)
AGING
sarcopenia and aging, 157–167 (May)
study of vitamins E and C for the protection of Alzheimer's disease, 69–73 (Feb)
AGRICULTURAL BIOTECHNOLOGY
safety assessment of foods produced through agricultural biotechnology, S135–S140 (Jun)
ALL-*TRANS*-RETINAL
lipofusion and macular degeneration, 342–346 (Oct)
ALUMINUM
role of aluminum in parental nutrition-associated cholestasis, 306–310 (Sep)
ALZHEIMER'S DISEASE
iron and Parkinson's disease, 311–313 (Sep)
ketones: metabolism's ugly duckling, 327–341 (Oct)
study of vitamins E and C for the protection of Alzheimer's disease, 69–73 (Feb)
ANGIOGENESIS
regulation of adiposity using angiogenesis inhibitors, 384–387 (Nov)
ANGIOGENESIS INHIBITOR
regulation of adiposity using angiogenesis inhibitors, 384–387 (Nov)
ANOREXIA NERVOSA
pathophysiologic characteristics of the activity-stress paradigm in animal models, S75–S79 (May)
role of neuropeptide Y in feeding behavior and zinc deficiency, 247–249 (Jul)
ANTIBIOTIC-RESISTANT PATHOGENS
role of probiotics on health or disease prevention, 91–99 (Mar)
ANTIOXIDANT
role diet plays on risk of cancer, 250–254 (Jul)
study of vitamins E and C for the protection of Alzheimer's disease, 69–73 (Feb)
APOA-I
lipoprotein metabolism in obesity and diabetes, 363–375 (Nov)
APOB-48
lipoprotein metabolism in obesity and diabetes, 363–375 (Nov)
APOB-100
lipoprotein metabolism in obesity and diabetes, 363–375 (Nov)
APPETITE
glycemic carbohydrate and health, S1–S4 (May)
ARE
role diet plays on risk of cancer, 250–254 (Jul)
ARTIFICIAL SWEETNERS
artificial sweetners for body weight control, 219–221 (Jun)
ASIANS
body composition and dietary intake of Asians in Singapore, S80–S87 (May)
BMI and mortality in Asian populations, 104–107 (Mar)
ASPARTAME
artificial sweetners for body weight control, 219–221 (Jun)
ATHEROSCLEROSIS
dietary fatty acids in regulating the activation of vascular endothelial cells during atherogenesis, 272–279 (Aug)
role of adhesion molecules on cardiovascular disease, 63–68 (Feb)

AXOKINE
role of ciliary neurotrophic factor (CNTF) in obesity, 423–426 (Dec)

BASAL METABOLIC RATE
predicting energy requirements in the clinical setting, 143–151 (Apr)
BENZODIAZEPINE
brain mechanisms of sweetness and palatability of sugars, S5–S9 (May)
BETA CELLS
study of adult obesity and type 2 diabetes, 176–179 (May)
BEVERAGE
artificial sweetners for body weight control, 219–221 (Jun)
BIOAVAILABILITY
bioactive isoflavones in functional foods, 204–213 (Jun)
BIOFORTIFICATION
productivity improvements in rice, S114–S116 (Jun)
BIOTECHNOLOGY
biotechnology and enhanced food production, S117–S123 (Jun)
BIOTIC STRESS
productivity improvements in rice, S114–S116 (Jun)
BLACK COHOSH
treatment of menopausal symptoms using black cohosh, 183–186 (May)
BODY MASS INDEX
BMI and mortality in Asian populations, 104–107 (Mar)
body composition and dietary intake of Asians in Singapore, S80–S87 (May)
overweight and obesity are associated with increased morbidity, 313–316 (Sep)
relationship between obesity and breast cancer risk, 73–76 (Feb)
BODY WEIGHT REGULATION
glycemic carbohydrate and body weight regulation, S10–S16 (May)
BONE
lactose intolerance and its link to osteoporosis, 221–223 (Jun)
BONE POSTMENOPAUSAL WOMEN
effect of high salt intake on bone resorption, 179–183 (May)
BOTANICAL
treatment of menopausal symptoms using black cohosh, 183–186 (May)
BRAIN
brain mechanisms of sweetness and palatability of sugars, S5–S9 (May)
glycemic carbohydrate and health, S1–S4 (May)
BREAST CANCER MORTALITY
relationship between obesity and breast cancer risk, 73–76 (Feb)

BREAST CANCER RISK
relationship between obesity and breast cancer risk, 73–76 (Feb)

CALCITRIOL ANALOGS
vitamin D as cancer chemopreventive agents, 227–238 (Jul)
CANCER
identifying dietary components that are protective against gastrointestinal tumorigenesis, 255–258 (Jul)
retinoids and epigenetic silencing in cancer, 284–289 (Aug)
role diet plays on risk of cancer, 250–254 (Jul)
role of soy in reducing prostate cancer, 117–131 (Apr)
CANCER TREATMENT
anticarcinogenic potential of soybean lectin and lunasin, 239–246 (Jul)
CARBOHYDRATE
carbohydrate, memory, and mood, S61–S67 (May)
dietary carbohydrate, glucose regulation, and cognitive performance in the elderly, S68–S74 (May)
glycemic carbohydrate and health, S1–S4 (May)
glycemic responses of carbohydrate foods, S40–S48 (May)
role of carbohydrates in health and disease, S34–S39 (May)
CARDIOVASCULAR DISEASE
glycemic load and chronic disease, S49–S55 (May)
role of diet and genotype on health implications of iron, 45–62 (Feb)
role of isoflavones in the hypocholesterolemic effect of soy, 189–203 (Jun)
role of policosanols in the prevention and treatment of cardiovascular disease, 376–383 (Nov)
β-CAROTENE
vitamin A, β-carotene, and mother-to-child transmission of HIV, 280–283 (Aug)
CHELATION
iron and Parkinson's disease, 311–313 (Sep)
CHOLESTASIS
role of aluminum in parental nutrition-associated cholestasis, 306–310 (Sep)
CHOLESTEROL
role of isoflavones in the hypocholesterolemic effect of soy, 189–203 (Jun)
role of policosanols in the prevention and treatment of cardiovascular disease, 376–383 (Nov)
CLINICAL NUTRITION PRACTICE
predicting energy requirements in the clinical setting, 143–151 (Apr)
CLINICAL PRACTICE
evaluation of insulin sensitivity, 397–412 (Dec)
CNTF
role of ciliary neurotrophic factor (CNTF) in obesity, 423–426 (Dec)

COGNITIVE DEVELOPMENT
assessment of cognitive performance in children, 413–422 (Dec)
COGNITIVE PERFORMANCE
assessment of cognitive performance in children, 413–422 (Dec)
dietary carbohydrate, glucose regulation, and cognitive performance in the elderly, S68–S74 (May)
COLON
identifying dietary components that are protective against gastrointestinal tumorigenesis, 255–258 (Jul)
COLORECTAL NEOPLASMS
role of diet and genotype on health implications of iron, 45–62 (Feb)
CONTAMINATION
role of aluminum in parental nutrition-associated cholestasis, 306–310 (Sep)
COW MILK
nutritional and physiologic significance of α-lactalbumin in infants, 295–305 (Sep)
CRUCIFER
role diet plays on risk of cancer, 250–254 (Jul)
CULTURE FAIR ASSESSMENT
assessment of cognitive performance in children, 413–422 (Dec)
CYSTATHIONINE β-SYNTHASE
study of homocysteine metabolism, 136–138 (Apr)

DEHYDRATION
hydration research reflects critical issues, 261–271 (Aug)
DELTANOIDS
vitamin D as cancer chemopreventive agents, 227–238 (Jul)
DIABETES
adiponectin as a regulator of energy homeostasis, 290–292 (Aug)
case study of childhood undernutrition in Brazil, 168–175 (May)
effect of Mediterranean diet for prevention of coronary heart disease, S56–S60 (May)
glycemic load and chronic disease, S49–S55 (May)
lipoprotein metabolism in obesity and diabetes, 363–375 (Nov)
study of adult obesity and type 2 diabetes, 176–179 (May)
study of homocysteine metabolism, 136–138 (Apr)
DIET
identifying dietary components that are protective against gastrointestinal tumorigenesis, 255–258 (Jul)
role that weight and physical activity play in the development of type 2 diabetes mellitus, 76–79 (Feb)
DIETARY INTAKE
safety review of soy isoflavones, 1–33 (Jan)
DIETARY IRON
role of diet and genotype on health implications of iron, 45–62 (Feb)
DIETETIC PRACTICE
predicting energy requirements in the clinical setting, 143–151 (Apr)
DIET PLANNING
diet planning using dietary reference intakes, 352–360 (Oct)
1α,25-DIHYDROXYVITAMIN D_3 ANALOGS
vitamin D as cancer chemopreventive agents, 227–238 (Jul)
DOPAMINE
brain mechanisms of sweetness and palatability of sugars, S5–S9 (May)
iron and Parkinson's disease, 311–313 (Sep)

EATING DISORDERS
role of neuropeptide Y in feeding behavior and zinc deficiency, 247–249 (Jul)
β-ENDORPHIN
brain mechanisms of sweetness and palatability of sugars, S5–S9 (May)
ENDOTHELIAL CELLS
dietary fatty acids in regulating the activation of vascular endothelial cells during atherogenesis, 272–279 (Aug)
ENERGY
diet planning using dietary reference intakes, 352–360 (Oct)
ENERGY BALANCE
role of ciliary neurotrophic factor (CNTF) in obesity, 423–426 (Dec)
ENERGY REGULATION
effect of Ghrelin, 101–104 (Mar)
ENERGY REQUIREMENTS
predicting energy requirements in the clinical setting, 143–151 (Apr)
ESTROGENIC
treatment of menopausal symptoms using black cohosh, 183–186 (May)
EXERCISE
role that weight and physical activity play in the development of type 2 diabetes mellitus, 76–79 (Feb)
EXERCISE-INDUCED MUSCLE FORMATION
consumption of glycemic carbohydrates and protein in enhancing the exercise-induced muscle formation, S88–S94 (May)

FATTY ACID OXIDATION
function of the nuclear receptor peroxisome proliferator-activated receptor delta, 387–390 (Nov)
role of carbohydrates in health and disease, S34–S39 (May)

FATTY ACIDS
dietary fatty acids in regulating the activation of vascular endothelial cells during atherogenesis, 272–279 (Aug)
FIBER
effect of Mediterranean diet for prevention of coronary heart disease, S56–S60 (May)
FLUID AND ELECTROLYTE BALANCE
hydration research reflects critical issues, 261–271 (Aug)
FLUID REQUIREMENTS
hydration research reflects critical issues, 261–271 (Aug)
FOOD ALLERGY
safety assessment of foods produced through agricultural biotechnology, S135–S140 (Jun)
FOOD AND DRUG LAWS
biotechnology and enhanced food production, S117–S123 (Jun)
FOOD INTAKE
effect of glycemic carbohydrates on short-term satiety and food intake, S17–S26 (May)
role of ciliary neurotrophic factor (CNTF) in obesity, 423–426 (Dec)
FRAILTY
sarcopenia and aging, 157–167 (May)

GASTROCNEMIUS MUSCLE
up-regulation of ubiquitin-proteasome system is a common mechanism for injury-induced muscle proteolysis, 34–38 (Jan)
GASTROINTESTINAL CANCER
finding a place for immunonutrition, 214–218 (Jun)
GASTROINTESTINAL TRACT
role of probiotics on health or disease prevention, 91–99 (Mar)
GENE DISCOVERY
safety assessment of foods produced through agricultural biotechnology, S135–S140 (Jun)
GENE MUTATIONS
genetic testing used to screen for hereditary hemochromatosis, 38–42 (Jan)
GENETIC ADMIXTURE
racial differences in obesity and metabolic syndrome traits, 316–319 (Sep)
GENETICALLY MODIFIED FOOD
genetically modified virus-resistant sweet potato for subsistence farmers in Kenya, S110–S113 (Jun)
GENETICALLY MODIFIED PLANTS
biotechnology, the environment, and sustainablity, S105–S109 (Jun)
GENISTEIN
effects of genistein on the prevention of early postmenopausal bone loss, 346–351 (Oct)
role of soy in reducing prostate cancer, 117–131 (Apr)
GENOME TRANSLATION
nutrient control of genome translation, 427–431 (Dec)
GHRELIN
effect of Ghrelin, 101–104 (Mar)
interaction among insulin, leptin, and ghrelin, 391–393 (Nov)
GLUCOSE
carbohydrate, memory, and mood, S61–S67 (May)
dietary carbohydrate, glucose regulation, and cognitive performance in the elderly, S68–S74 (May)
glycemic responses of carbohydrate foods, S40–S48 (May)
pathophysiologic characteristics of the activity-stress paradigm in animal models, S75–S79 (May)
role of carbohydrates in health and disease, S34–S39 (May)
GLUCOSE INTOLERANCE
adiponectin as a regulator of energy homeostasis, 290–292 (Aug)
GLYCEMIA
role of carbohydrates in health and disease, S34–S39 (May)
GLYCEMIC CARBOHYDRATE
effect of glycemic carbohydrates on short-term satiety and food intake, S17–S26 (May)
glycemic carbohydrate and body weight regulation, S10–S16 (May)
GLYCEMIC INDEX
carbohydrate, memory, and mood, S61–S67 (May)
effect of Mediterranean diet for prevention of coronary heart disease, S56–S60 (May)
glycemic carbohydrate and health, S1–S4 (May)
glycemic load and chronic disease, S49–S55 (May)
glycemic responses of carbohydrate foods, S40–S48 (May)
role of carbohydrates in health and disease, S34–S39 (May)
GOLDEN RICE
nutritionally enhanced rice to combat malnutrition disorders of the poor, S101–S104 (Jun)
GUT MICROFLORA
bioactive isoflavones in functional foods, 204–213 (Jun)

HDL
lipoprotein metabolism in obesity and diabetes, 363–375 (Nov)
HEART DISEASE
overweight in childhood and the impact on adult health, 139–142 (Apr)
HEAT SHOCK PROTEIN
effects of high-sucrose diet on body weight, plasma triglycerides, and stress tolerance, S27–S33 (May)

HEMAGGLUTININS
anticarcinogenic potential of soybean lectin and lunasin, 239–246 (Jul)
HEMOCHROMATOSIS
genetic testing used to screen for hereditary hemochromatosis, 38–42 (Jan)
HFE
genetic testing used to screen for hereditary hemochromatosis, 38–42 (Jan)
role of diet and genotype on health implications of iron, 45–62 (Feb)
HIGH-IRON RICE
nutritionally enhanced rice to combat malnutrition disorders of the poor, S101–S104 (Jun)
HIGH-QUALITY PROTEIN RICE
nutritionally enhanced rice to combat malnutrition disorders of the poor, S101–S104 (Jun)
HIGH-SUCROSE DIET
effects of high-sucrose diet on body weight, plasma triglycerides, and stress tolerance, S27–S33 (May)
HISTONES
retinoids and epigenetic silencing in cancer, 284–289 (Aug)
HIV
vitamin A, β-carotene, and mother-to-child transmission of HIV, 280–283 (Aug)
HOMOCYSTEINE
study of homocysteine metabolism, 136–138 (Apr)
HORMONE
effect of Ghrelin, 101–104 (Mar)
HRT
effects of genistein on the prevention of early postmenopausal bone loss, 346–351 (Oct)
HUMAN IMMUNODEFICIENCY VIRUS
role of malnutrition in tuberculosis and HIV, 81–90 (Mar)
HUMANITARIAN PROJECT
nutritionally enhanced rice to combat malnutrition disorders of the poor, S101–S104 (Jun)
HUMAN MILK
nutritional and physiologic significance of α-lactalbumin in infants, 295–305 (Sep)
HYDRATION
hydration research reflects critical issues, 261–271 (Aug)
25-HYDROXYVITAMIN D
vitamin D insufficiency in healthy adults in Canada and the United States, 107–113 (Mar)
HYPERGLYCEMIA
study of adult obesity and type 2 diabetes, 176–179 (May)
HYPERKETONEMIA
ketones: metabolism's ugly duckling, 327–341 (Oct)
HYPERTENSION
case study of childhood undernutrition in Brazil, 168–175 (May)
HYPOKALEMIA
refeeding syndrome and hypophosphatemia, 320–323 (Sep)
HYPOMAGNESEMIA
refeeding syndrome and hypophosphatemia, 320–323 (Sep)
HYPOPHOSPHATEMIA
refeeding syndrome and hypophosphatemia, 320–323 (Sep)
HYPOTHALAMUS
role of neuropeptide Y in feeding behavior and zinc deficiency, 247–249 (Jul)

IMMUNONUTRITION
finding a place for immunonutrition, 214–218 (Jun)
INFANT FORMULA
nutritional and physiologic significance of α-lactalbumin in infants, 295–305 (Sep)
INJURY
predicting energy requirements in the clinical setting, 143–151 (Apr)
up-regulation of ubiquitin-proteasome system is a common mechanism for injury-induced muscle proteolysis, 34–38 (Jan)
INSULIN
adiponectin as a regulator of energy homeostasis, 290–292 (Aug)
consumption of glycemic carbohydrates and protein in enhancing the exercise-induced muscle formation, S88–S94 (May)
interaction among insulin, leptin, and ghrelin, 391–393 (Nov)
lipoprotein metabolism in obesity and diabetes, 363–375 (Nov)
study of homocysteine metabolism, 136–138 (Apr)
INSULIN RESISTANCE
evaluation of insulin sensitivity, 397–412 (Dec)
INSULIN SENSITIVITY
evaluation of insulin sensitivity, 397–412 (Dec)
IRES
nutrient control of genome translation, 427–431 (Dec)
IRON
iron and Parkinson's disease, 311–313 (Sep)
IRON OVERLOAD
genetic testing used to screen for hereditary hemochromatosis, 38–42 (Jan)
ISOFLAVONES
bioactive isoflavones in functional foods, 204–213 (Jun)
role of isoflavones in the hypocholesterolemic effect of soy, 189–203 (Jun)
role of soy in reducing prostate cancer, 117–131 (Apr)
ITAF
nutrient control of genome translation, 427–431 (Dec)

KENYA
genetically modified virus-resistant sweet potato for subsistence farmers in Kenya, S110–S113 (Jun)
KETOGENIC DIET
ketones: metabolism's ugly duckling, 327–341 (Oct)
KETONE METABOLISM
ketones: metabolism's ugly duckling, 327–341 (Oct)
KINETICS
lipoprotein metabolism in obesity and diabetes, 363–375 (Nov)
KNOCK-OUT MICE
identifying dietary components that are protective against gastrointestinal tumorigenesis, 255–258 (Jul)

α-LACTALBUMIN
nutritional and physiologic significance of α-lactalbumin in infants, 295–305 (Sep)
LACTOSE INTOLERANCE
lactose intolerance and its link to osteoporosis, 221–223 (Jun)
LATITUDE
vitamin D insufficiency in healthy adults in Canada and the United States, 107–113 (Mar)
LDL
lipoprotein metabolism in obesity and diabetes, 363–375 (Nov)
LECTIN
anticarcinogenic potential of soybean lectin and lunasin, 239–246 (Jul)
LEPTIN
interaction among insulin, leptin, and ghrelin, 391–393 (Nov)
role of ciliary neurotrophic factor (CNTF) in obesity, 423–426 (Dec)
LIFESTYLE
role that weight and physical activity play in the development of type 2 diabetes mellitus, 76–79 (Feb)
LIPOFUSCIN
lipofusion and macular degeneration, 342–346 (Oct)
LIPOPROTEIN METABOLISM
lipoprotein metabolism in obesity and diabetes, 363–375 (Nov)
LUNASIN
anticarcinogenic potential of soybean lectin and lunasin, 239–246 (Jul)

MACRONUTRIENTS
diet planning using dietary reference intakes, 352–360 (Oct)
MALNUTRITION
role of malnutrition in tuberculosis and HIV, 81–90 (Mar)
MEASUREMENT
evaluation of insulin sensitivity, 397–412 (Dec)
MEDITERRANEAN DIET
effect of Mediterranean diet for prevention of coronary heart disease, S56–S60 (May)
MEMORY
carbohydrate, memory, and mood, S61–S67 (May)
MENOPAUSE
treatment of menopausal symptoms using black cohosh, 183–186 (May)
METABOLIC BONE DISEASE
possible risk factor for metabolic bone disease, 132–135 (Apr)
METABOLISM
glycemic responses of carbohydrate foods, S40–S48 (May)
interaction among insulin, leptin, and ghrelin, 391–393 (Nov)
METHODOLOGY
glycemic responses of carbohydrate foods, S40–S48 (May)
METHYLATION
retinoids and epigenetic silencing in cancer, 284–289 (Aug)
MINERALS
diet planning using dietary reference intakes, 352–360 (Oct)
MITOCHONDRIOPATHIES
ketones: metabolism's ugly duckling, 327–341 (Oct)
MOOD
carbohydrate, memory, and mood, S61–S67 (May)
MORBIDITY
overweight and obesity are associated with increased morbidity, 313–316 (Sep)
MORTALITY
BMI and mortality in Asian populations, 104–107 (Mar)
overweight and obesity are associated with increased morbidity, 313–316 (Sep)
MUSCLE
sarcopenia and aging, 157–167 (May)
MUSCLE PROTEOLYSIS
up-regulation of ubiquitin-proteasome system is a common mechanism for injury-induced muscle proteolysis, 34–38 (Jan)

NEUROCOGNITION
study of vitamins E and C for the protection of Alzheimer's disease, 69–73 (Feb)
NO SYNTHASE
dietary fatty acids in regulating the activation of vascular endothelial cells during atherogenesis, 272–279 (Aug)
N-3 PUFA
role of adhesion molecules on cardiovascular disease, 63–68 (Feb)
NPY
role of neuropeptide Y in feeding behavior and zinc deficiency, 247–249 (Jul)

NRF2
role diet plays on risk of cancer, 250–254 (Jul)
NUCLEAR RECEPTOR
function of the nuclear receptor peroxisome proliferator–activated receptor delta, 387–390 (Nov)
NUTRITION
assessment of cognitive performance in children, 413–422 (Dec)
NUTRITIONAL INTERVENTIONS
role of malnutrition in tuberculosis and HIV, 81–90 (Mar)

OBESITY
adiponectin as a regulator of energy homeostasis, 290–292 (Aug)
BMI and mortality in Asian populations, 104–107 (Mar)
case study of childhood undernutrition in Brazil, 168–175 (May)
effect of Ghrelin, 101–104 (Mar)
function of the nuclear receptor peroxisome proliferator-activated receptor delta, 387–390 (Nov)
glycemic load and chronic disease, S49–S55 (May)
interaction among insulin, leptin, and ghrelin, 391–393 (Nov)
lipoprotein metabolism in obesity and diabetes, 363–375 (Nov)
overweight and obesity are associated with increased morbidity, 313–316 (Sep)
racial differences in obesity and metabolic syndrome traits, 316–319 (Sep)
regulation of adiposity using angiogenesis inhibitors, 384–387 (Nov)
relationship between obesity and breast cancer risk, 73–76 (Feb)
study of adult obesity and type 2 diabetes, 176–179 (May)
OBSESSIVE-COMPULSIVE DISORDER
pathophysiologic characteristics of the activity-stress paradigm in animal models, S75–S79 (May)
OLEIC ACID
role of adhesion molecules on cardiovascular disease, 63–68 (Feb)
OSTEOMALACIA
possible risk factor for metabolic bone disease, 132–135 (Apr)
OSTEOPENIA
lactose intolerance and its link to osteoporosis, 221–223 (Jun)
OSTEOPOROSIS
lactose intolerance and its link to osteoporosis, 221–223 (Jun)
possible risk factor for metabolic bone disease, 132–135 (Apr)
OVERWEIGHT
overweight and obesity are associated with increased morbidity, 313–316 (Sep)
OVERWEIGHT CHILDREN
overweight in childhood and the impact on adult health, 139–142 (Apr)
OXIDATION
iron and Parkinson's disease, 311–313 (Sep)
OXIDATIVE STRESS
dietary fatty acids in regulating the activation of vascular endothelial cells during atherogenesis, 272–279 (Aug)

PANCREAS
study of adult obesity and type 2 diabetes, 176–179 (May)
PARENTAL NUTRITION
role of aluminum in parental nutrition-associated cholestasis, 306–310 (Sep)
PARKINSON'S DISEASE
iron and Parkinson's disease, 311–313 (Sep)
ketones: metabolism's ugly duckling, 327–341 (Oct)
PEPTIDE
effect of Ghrelin, 101–104 (Mar)
PEROXISOME PROLIFERATOR–ACTIVATED RECEPTOR
function of the nuclear receptor peroxisome proliferator-activated receptor delta, 387–390 (Nov)
PHYSICAL ACTIVITY
role that weight and physical activity play in the development of type 2 diabetes mellitus, 76–79 (Feb)
PHYTOESTROGENS
effects of genistein on the prevention of early postmenopausal bone loss, 346–351 (Oct)
role of isoflavones in the hypocholesterolemic effect of soy, 189–203 (Jun)
safety review of soy isoflavones, 1–33 (Jan)
PIMA INDIANS
adiponectin as a regulator of energy homeostasis, 290–292 (Aug)
PLASMA TRIGLYCERIDES
effects of high-sucrose diet on body weight, plasma triglycerides, and stress tolerance, S27–S33 (May)
POLICOSANOLS
role of policosanols in the prevention and treatment of cardiovascular disease, 376–383 (Nov)
POSTMENOPAUSAL BONE LOSS
effects of genistein on the prevention of early postmenopausal bone loss, 346–351 (Oct)
POSTOPERATIVE COMPLICATIONS
finding a place for immunonutrition, 214–218 (Jun)
POSTPRANDIAL HYPERGLYCEMIA
glycemic load and chronic disease, S49–S55 (May)
POTASSIUM
effect of high salt intake on bone resorption, 179–183 (May)

PPAR
function of the nuclear receptor peroxisome proliferator-activated receptor delta, 387–390 (Nov)
PRECAUTIONARY PRINCIPLE
biotechnology and enhanced food production, S117–S123 (Jun)
PREGNANCY
vitamin A, β-carotene, and mother-to-child transmission of HIV, 280–283 (Aug)
PROBIOTICS INTESTINAL HEALTH
role of probiotics on health or disease prevention, 91–99 (Mar)
PROSTATE
role of soy in reducing prostate cancer, 117–131 (Apr)
PROTEIN
consumption of glycemic carbohydrates and protein in enhancing the exercise-induced muscle formation, S88–S94 (May)

RACE
vitamin D insufficiency in healthy adults in Canada and the United States, 107–113 (Mar)
RACIAL DIFFERENCES
racial differences in obesity and metabolic syndrome traits, 316–319 (Sep)
RECOMMENDED INTAKES
diet planning using dietary reference intakes, 352–360 (Oct)
REFEEDING SYNDROME
refeeding syndrome and hypophosphatemia, 320–323 (Sep)
REFERENCE STANDARDS
BMI and mortality in Asian populations, 104–107 (Mar)
RESEARCH
evaluation of insulin sensitivity, 397–412 (Dec)
RETINA
lipofusion and macular degeneration, 342–346 (Oct)
REVIEW
role of soy in reducing prostate cancer, 117–131 (Apr)
RIBOSWITCH
nutrient control of genome translation, 427–431 (Dec)
RISK ASSESSMENT
biotechnology, the environment, and sustainablity, S105–S109 (Jun)

SAFETY
safety review of soy isoflavones, 1–33 (Jan)
SAFETY ASSESSMENT
safety assessment of foods produced through agricultural biotechnology, S135–S140 (Jun)
SARCOPENIA
sarcopenia and aging, 157–167 (May)
SEASON
vitamin D insufficiency in healthy adults in Canada and the United States, 107–113 (Mar)
SEIZURE DISORDERS
ketones: metabolism's ugly duckling, 327–341 (Oct)
SKELETAL MUSCLE PROTEIN
up-regulation of ubiquitin-proteasome system is a common mechanism for injury-induced muscle proteolysis, 34–38 (Jan)
SMALL INTESTINAL BACTERIAL OVERGROWTH
possible risk factor for metabolic bone disease, 132–135 (Apr)
SMALL INTESTINE
identifying dietary components that are protective against gastrointestinal tumorigenesis, 255–258 (Jul)
SMOKING
overweight in childhood and the impact on adult health, 139–142 (Apr)
SODIUM
effect of high salt intake on bone resorption, 179–183 (May)
SOLUBLE ADHESION MOLECULES
role of adhesion molecules on cardiovascular disease, 63–68 (Feb)
SOY
role of isoflavones in the hypocholesterolemic effect of soy, 189–203 (Jun)
role of soy in reducing prostate cancer, 117–131 (Apr)
SOYBEAN
anticarcinogenic potential of soybean lectin and lunasin, 239–246 (Jul)
SOY ISOFLAVONES
safety review of soy isoflavones, 1–33 (Jan)
STARGARDT DISEASE
lipofusion and macular degeneration, 342–346 (Oct)
STRESS
glycemic carbohydrate and health, S1–S4 (May)
STUNTING
case study of childhood undernutrition in Brazil, 168–175 (May)
SUBSTANTIAL EQUIVALENCE
biotechnology, the environment, and sustainablity, S105–S109 (Jun)
SUCROSE
artificial sweetners for body weight control, 219–221 (Jun)
SUGARS
effect of glycemic carbohydrates on short-term satiety and food intake, S17–S26 (May)
SWEET POTATO
genetically modified virus-resistant sweet potato for subsistence farmers in Kenya, S110–S113 (Jun)

TASTE
brain mechanisms of sweetness and palatability of sugars, S5–S9 (May)
TOXICITY
safety review of soy isoflavones, 1–33 (Jan)
TRANSCRIPTION
role diet plays on risk of cancer, 250–254 (Jul)
TRANSMISSION
vitamin A, β-carotene, and mother-to-child transmission of HIV, 280–283 (Aug)
TRANSSULFURATION
study of homocysteine metabolism, 136–138 (Apr)
TRIGLYCERIDES
lipoprotein metabolism in obesity and diabetes, 363–375 (Nov)
role of isoflavones in the hypocholesterolemic effect of soy, 189–203 (Jun)
TUBERCULOSIS
role of malnutrition in tuberculosis and HIV, 81–90 (Mar)
TYPE 2 DIABETES
role of diet and genotype on health implications of iron, 45–62 (Feb)
role that weight and physical activity play in the development of type 2 diabetes mellitus, 76–79 (Feb)

UBIQUITIN-PROTEASOME SYSTEM
up-regulation of ubiquitin-proteasome system is a common mechanism for injury-induced muscle proteolysis, 34–38 (Jan)
UNCOUPLING ENZYMES
function of the nuclear receptor peroxisome proliferator-activated receptor delta, 387–390 (Nov)
UNDERNUTRITION
case study of childhood undernutrition in Brazil, 168–175 (May)
UTEROPLACENTAL INSUFFICIENCY
study of adult obesity and type 2 diabetes, 176–179 (May)
UTR
nutrient control of genome translation, 427–431 (Dec)

VITAMIN A
retinoids and epigenetic silencing in cancer, 284–289 (Aug)
vitamin A, β-carotene, and mother-to-child transmission of HIV, 280–283 (Aug)
VITAMIN A MALNUTRITION
nutritionally enhanced rice to combat malnutrition disorders of the poor, S101–S104 (Jun)
VITAMIN D INTAKE
vitamin D insufficiency in healthy adults in Canada and the United States, 107–113 (Mar)
VITAMIN E
role of adhesion molecules on cardiovascular disease, 63–68 (Feb)
VITAMINS
diet planning using dietary reference intakes, 352–360 (Oct)
VLDL
lipoprotein metabolism in obesity and diabetes, 363–375 (Nov)

WEIGHT GAIN
effects of high-sucrose diet on body weight, plasma triglycerides, and stress tolerance, S27–S33 (May)
WEIGHT LOSS
artificial sweetners for body weight control, 219–221 (Jun)
role that weight and physical activity play in the development of type 2 diabetes mellitus, 76–79 (Feb)
WHO
body composition and dietary intake of Asians in Singapore, S80–S87 (May)

YIELD POTENTIAL
productivity improvements in rice, S114–S116 (Jun)
YIELD STABILITY
productivity improvements in rice, S114–S116 (Jun)

ZINC
role of neuropeptide Y in feeding behavior and zinc deficiency, 247–249 (Jul)

Statement of Ownership, Management, and Circulation

1. Publication Title: Nutrition Reviews
2. Publication Number: 0 0 2 9 - 1 6 6 4
3. Filing Date: 12/9/03
4. Issue Frequency: Monthly
5. Number of Issues Published Annually: 12
6. Annual Subscription Price: $265.00
7. Complete Mailing Address of Known Office of Publication (Not printer): One Thomas Circle, 9th Floor, Washington, DC 20005
Contact Person: Rebecca Tippett
Telephone: 202-649-6674
8. Complete Mailing Address of Headquarters or General Business Office of Publisher (Not printer): International Life Sciences Institute, One Thomas Circle, NW, 9th Floor, Washington, DC 20005
9. Full Names and Complete Mailing Addresses of Publisher, Editor, and Managing Editor (Do not leave blank)
Publisher (Name and complete mailing address): International Life Sciences Institute, One Thomas Circle, NW, 9th Floor, Washington, DC 20005
Editor (Name and complete mailing address): Robert Russell, MD, Director Jean Mayer USDA Human Nutrition Research Center on Aging, Tufts University, 711 Washington St., Boston, MA 02111
Managing Editor (Name and complete mailing address): Lynn McLaughlin, Tufts University, 711 Washington St., Boston, MA 02111
10. Owner (Do not leave blank. If the publication is owned by a corporation, give the name and address of the corporation immediately followed by the names and addresses of all stockholders owning or holding 1 percent or more of the total amount of stock. If not owned by a corporation, give the names and addresses of the individual owners. If owned by a partnership or other unincorporated firm, give its name and address as well as those of each individual owner. If the publication is published by a nonprofit organization, give its name and address.)
Full Name: International Life Sciences Institute
Complete Mailing Address: One Thomas Circle, NW, Ninth Floor, Washington, DC 20005
11. Known Bondholders, Mortgagees, and Other Security Holders Owning or Holding 1 Percent or More of Total Amount of Bonds, Mortgages, or Other Securities. If none, check box: ☒ None
12. Tax Status (For completion by nonprofit organizations authorized to mail at nonprofit rates) (Check one)
The purpose, function, and nonprofit status of this organization and the exempt status for federal income tax purposes:
☐ Has Not Changed During Preceding 12 Months
☐ Has Changed During Preceding 12 Months (Publisher must submit explanation of change with this statement)
PS Form 3526, October 1999 See Instructions on Reverse

13. Publication Title: Nutrition Reviews	14. Issue Date for Circulation Data Below: November 2003	
15. Extent and Nature of Circulation	Average No. Copies Each Issue During Preceding 12 Months	No. Copies of Single Issue Published Nearest to Filing Date
a. Total Number of Copies (Net press run)	3632	5496
b. Paid and/or Requested Circulation (1) Paid/Requested Outside-County Mail Subscriptions Stated on Form 3541. (Include advertiser's proof and exchange copies)	2259	2444
(2) Paid In-County Subscriptions Stated on Form 3541 (Include advertiser's proof and exchange copies)	—	—
(3) Sales Through Dealers and Carriers, Street Vendors, Counter Sales, and Other Non-USPS Paid Distribution	—	—
(4) Other Classes Mailed Through the USPS	—	—
c. Total Paid and/or Requested Circulation (Sum of 15b. (1), (2),(3) and (4))	2259	2444
d. Free Distribution by Mail (Samples, complimentary, and other free) (1) Outside-County as Stated on Form 3541	—	—
(2) In-County as Stated on Form 3541	—	—
(3) Other Classes Mailed Through the USPS	—	—
e. Free Distribution Outside the Mail (Carriers or other means)	0	0
f. Total Free Distribution (Sum of 15d. and 15e.)	0	0
g. Total Distribution (Sum of 15c. and 15f.)	2259	2444
h. Copies not Distributed	1373	3052
i. Total (Sum of 15g. and h.)	3632	5496
j. Percent Paid and/or Requested Circulation (15c. divided by 15g. times 100)	100%	100%

16. Publication of Statement of Ownership
☒ Publication required. Will be printed in the December 2003 issue of this publication. ☐ Publication not required.
17. Signature and Title of Editor, Publisher, Business Manager, or Owner: Rebecca Tippett, Publisher. Date: December 10, 2003
I certify that all information furnished on this form is true and complete. I understand that anyone who furnishes false or misleading information on this form or who omits material or information requested on the form may be subject to criminal sanctions (including fines and imprisonment) and/or civil sanctions (including civil penalties).

Instructions to Publishers
1. Complete and file one copy of this form with your postmaster annually on or before October 1. Keep a copy of the completed form for your records.
2. In cases where the stockholder or security holder is a trustee, include in items 10 and 11 the name of the person or corporation for whom the trustee is acting. Also include the names and addresses of individuals who are stockholders who own or hold 1 percent or more of the total amount of bonds, mortgages, or other securities of the publishing corporation. In item 11, if none, check the box. Use blank sheets if more space is required.
3. Be sure to furnish all circulation information called for in item 15. Free circulation must be shown in items 15d, e, and f.
4. Item 15h., Copies not Distributed, must include (1) newsstand copies originally stated on Form 3541, and returned to the publisher, (2) estimated returns from news agents, and (3), copies for office use, leftovers, spoiled, and all other copies not distributed.
5. If the publication had Periodicals authorization as a general or requester publication, this Statement of Ownership, Management, and Circulation must be published; it must be printed in any issue in October or, if the publication is not published during October, the first issue printed after October.
6. In item 16, indicate the date of the issue in which this Statement of Ownership will be published.
7. Item 17 must be signed.
Failure to file or publish a statement of ownership may lead to suspension of Periodicals authorization.
